We, the undersigned, support Representative Ed Butcher's HB 418 which would allow for a Horse Slaughter and Processing Plant in Montana and we recognize the need for a facility of this type as many unwanted horses are being dumped and abandoned since there is currently no market for them.

Nancy Belk, DVM

Jody S. Anderson, DVM

February 11, 2009

Dear Montana Legislators,

Please support and vote for HB418.

In recent months my professional journals and other horse related publications I receive have been full of articles on the problems associated with the drastic increases of unwanted horses in this country since the closure of horse slaughter plants in the United States.

Horses are livestock. The fact that some have made them into companions does not negate the fact that they are property and owners have the right to use that property as they see fit as long as it is humane. An overpopulation of unwanted horses abandoned and starving is not humane. Regulated slaughter is humane.

Please put common sense back into our livestock industry. Let the stewards of horses make the decision of what is best for them by giving them the options necessary to make those decisions.

AGRICULTURE, CHAIRMAN
HIGHWAYS, VICE-CHAIRMAN
JUDICIARY

To members of the Agriculture Committee:

2-11-09

I would like to list my support for the passage of HB 418, which will authorize independent business investors to establish equine slaughter and processing facilities in Montana.

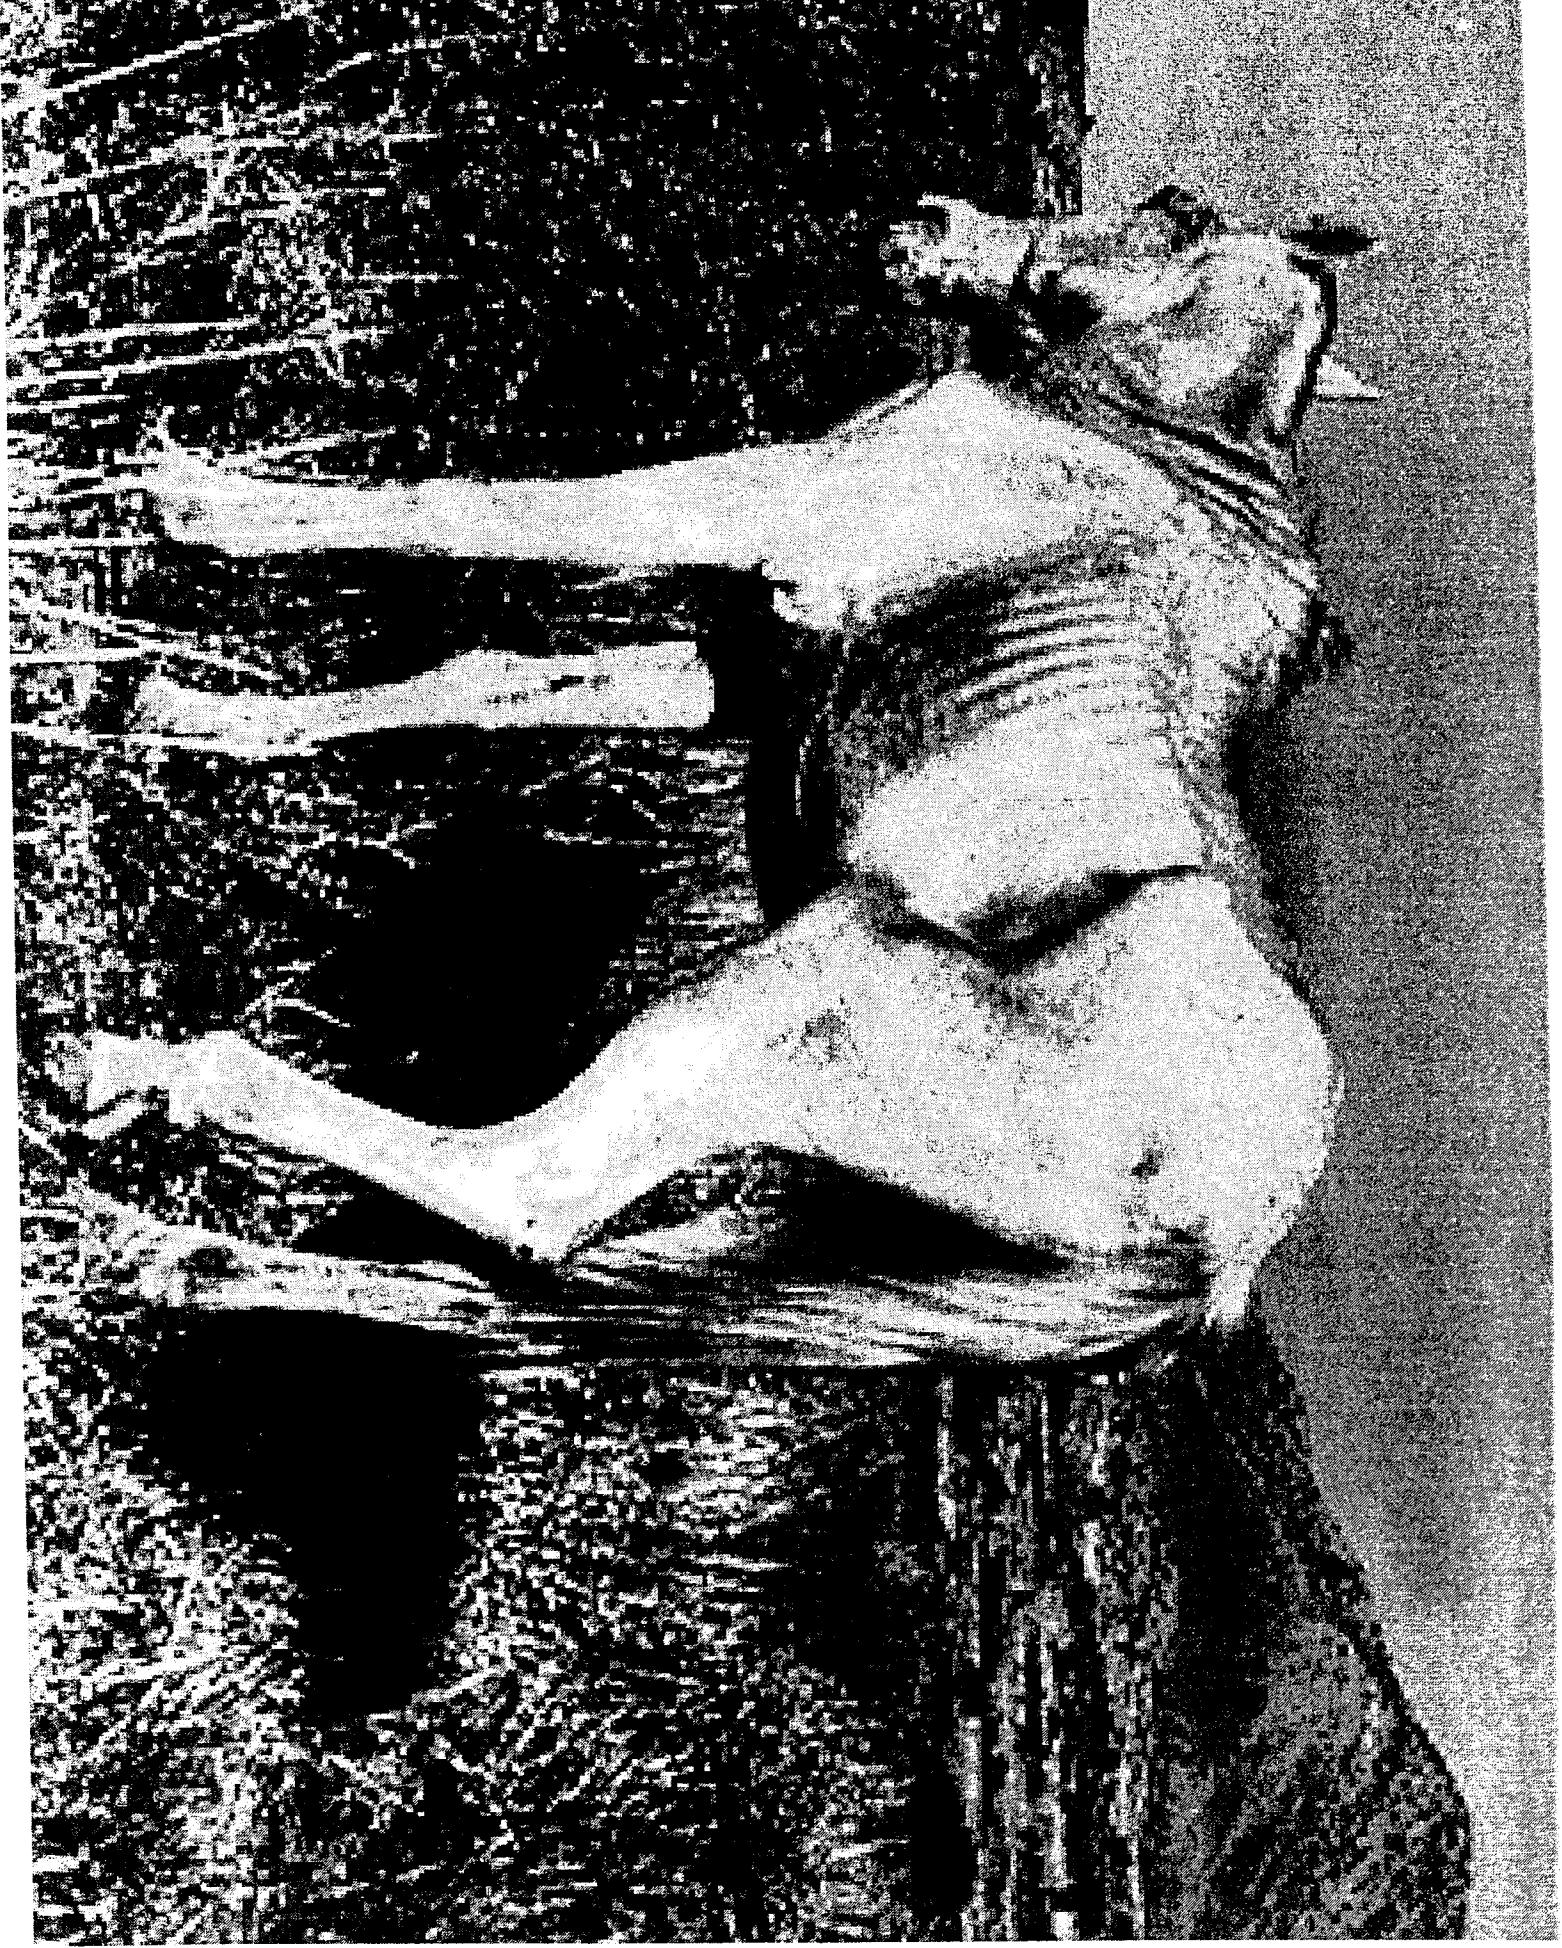

This is a special opportunity for Montana in view of the recent closures of processing plants all across the United States. Equine slaughter is an important part of production agriculture and herd health. It is quite natural that some animals will need to be culled from the U.S. herd as time passes along. Business agriculture is Montana's largest single industry. To establish a processing plant in Montana would represent a perfect fit for Montana and opening many avenues of trading partners world wide.

Animal rights groups have been targeting all segments of Montana's hunting and agriculture industry. Legislation crafted to protect this type of production agriculture from harassment by political opponents is necessary.

I would encourage the legislators this session to work hard to support HB 418 in a final form that will strive to assist the agriculture community this session.

Yours Truly,

*Ric Holden*Ric Holden
Former Chairman, Senate Agriculture Committee

Senator Butcher (3rivers)

Full Support for HB 418! I have grown up and lived in the horse industry thru and thru and still do today. The closer of slaughter houses for horses has been horrific for the animals. If people who were in favor of closeing slaughter houses that do not actually even own horses, want to see what is happening to these animals, they would be horrified. I think the picture I attached to this is a example of what HUNDREDS of horses are going thru, and this is one of the better pictures of a horse that has been turned out. Imagine what this horse went thru during these winter months. How did he survive...I bet he never, but put your self in his hoofs and imagine the death that he endured. Horses all over are actaully being hauled to state parks, open land, just anywhere and dumped to survive on there own. Do you know what those animals look like today. They are literally starving to death, and are so weak they go down and lay there unable to get up for days, before there body actaully shuts down and lets them die. That is inhuman and suffering beyond your belief. For the next 3-4 days, everytime you eat or get a drink of water, imagine yourself laying out in the middle of no where to weak to get up and known you are gonna die. That is what these animals are going thru, wouldn't a slaughter house be an blessing to them? Its just reality that horses are going to get old, some of them just dont have the mind to ever make a good working horse, and acciedents happen, and horses get hurt? Where do you take these horses? What is the best option for them right now? We all know what is happening to them, there suffering the worst deaths of all. Why not let there body be used for something productive that helps this world be successful in many ways? WHY WHY WHY? That is what I am asking? Its better then letting them suffer day and night until they finally just die. People can take there true pet th ere dog or cat to the human society any day of the week and drop it off, and that is legal. Enough dogs get killed in the United states each year to fill a professional football stadium THREE TIMES, top to bottom, tell me what is right about that? Please please help these horses stop suffering. PLEASE SUPPORT HOUSE BILL 418, your the only hope these animals have left, my heart is bleeding for them.

SUPPORT HOUSE BILL 418

BUCKSHOT NELSON
LORING, MONTANA
